

** Units in CSS. →

→ Jaise ham distance ko "km" me maapte hai waise hi "CSS" me koi v chiz kitni choti hai ya kitni badi hai usko ham "pixels (px)" me maapte hai.

pixels (px)

96 px = 1 inch

font-size: 2px;

→ CSS me units do types ke hote hai.

(i) Absolute units

pixels (px)

96 px = 1 inch

ex-

font-size: 2px;

(ii) Relative units.

+ ye ham aage padhenge

** Text Properties ("continued")

→ Line-height.

→ line-height: 2px

→ line-height: Normal

→ text ke ^{height} kitni honi chahiye apne hisab se set kr sakte hai.

→ text-transform.

• Isse text upper case hoga lower case jo hoga use change karne wala hai.

→ text-transform: uppercase / lowercase / Capitalize / Normal

↓
each word capital

↓
each word small

↓
first word capital

*** Practice set - 2

Q1 Create a heading centred on the page with all of its text capitalized by default.

Q2 Set the font family of all the content in the document to "Times New Roman".

- Q3
- Create one div inside another div.
 - Set id & text "Outer" for the first one & "inner" for the second one.
 - Set the div text size to 25px & inner div size to 10px.
